EXPERIMENTAL STUDY OF WOOD CHIP AS PARTIAL REPLACEMENT FOR  
COARSE AGGREGATE WITH RATIO 5%,10% AND 15%

MOHAMAD HAFIZ BIN MOHD SALEHIM

Thesis submitted in fulfillment of the requirements  
for the award of the  
Bachelor Degree in Civil Engineering

## **ACKNOWLEDGEMENTS**

First is thanks to Allah for let me complete this research. Although there is long journey for me to complete this study, but with Allah permission I have reach the end of this research journey.

Second is thanks to my research supervisor, Puan Shariza Binti Mat Aris for your time and sincere guidance that you have given to me from the beginning until the end of my research.

Third is thanks to my parent for the ongoing support. The continuous support has made me stand on the place that I'm standing now. Only Allah can repay the virtues that they have done to me.

Fourth is thanks to my friends for help and opinion. The hand that you lend during producing my research samples and the opinion you give are very helpful for me in the process of completing my research.

Last is thanks to the technicians at Makmal Konkrit dan Struktur Berat UMP for the assistances that provided to me during preparing and testing my research samples.
